SUMMARY

Final-year B.Tech Computer Science and Engineering student specializing in AI-ML with hands-on experience building full-stack web, mobile, and real-time applications. Experienced with React, TypeScript, Node.js, PostgreSQL, Prisma, REST/WebSocket APIs, authentication, performance optimization, and production debugging. Seeking entry-level Software Engineer, Full-Stack Developer, or Backend Developer opportunities.

EXPERIENCE

Software Development Engineer | Mar 2026 - May 2026

AMK Global Group · Remote

- Improved production web performance through refactoring, asset compression, lazy loading, and caching; reduced page-load time by approximately 30% and raised Lighthouse scores from approximately 65 to 90+.
- Implemented technical SEO improvements and contributed to third-party API, CRM, and automation-workflow integrations.
- Resolved 15+ production issues across web applications.

Full-Stack Developer Intern | Jun 2025 - Aug 2025

Horizon Beam / A Ryvent Info Tech Initiative - StayFindz · Remote

- Built responsive React interfaces for StayFindz and contributed to a 40+ screen mobile application.
- Contributed to Node.js/Express APIs and Prisma/SQLite database features for authentication, CRUD workflows, bookings, reviews, admin routes, and soft deletion.
- Deployed applications through Render and improved mobile-first UX through performance tuning.

Member of Technical Staff | Jan 2025 - Jun 2025

Snoozeit Media Pvt. Ltd.

- Contributed to Snoozeit, a short-form episodic streaming product that reached approximately 10K users, developing product features and mobile interfaces.
- Built and shipped Anyme, an anime microdrama application for Android and iOS that reached 1K+ Android downloads, supporting product development and mobile user experiences.

Project Trainee - Internship Program | Jun 5, 2024 - Aug 4, 2024

Samsung India Electronics Pvt. Ltd.

- Worked on a JSON-powered database and used Samsung in-house tools for API testing, API updates, and request/response verification as part of a fast-track Project Trainee assignment.

PROJECTS

Velocity - Real-Time Client Project Dashboard | React 19, TypeScript, Socket.IO, PostgreSQL, Prisma | Live Demo · GitHub

- Built a real-time project-management dashboard with Admin, Project Manager, and Developer views over a shared API.
- Enforced role-based visibility across REST query scoping and WebSocket event fanout; secured authentication with rotating HttpOnly refresh cookies and short-lived access tokens, verified through automated tests.

GeoTrack - Geofencing and Real-Time Alert System | Go, PostgreSQL, React, TypeScript, Leaflet, WebSockets, Docker Compose | Live Demo · GitHub

- Built a full-stack vehicle-tracking platform with real-time entry and exit detection using a ray-casting point-in-polygon algorithm.
- Implemented WebSocket alerts, rate limiting, a React/TypeScript map interface, a Go/PostgreSQL backend, Docker Compose deployment, and a Docker Hub image.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, Go

Frontend: React, Next.js, React Native, Vue.js, Tailwind CSS, Redux, Leaflet

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Databases: PostgreSQL, Prisma, MongoDB, MySQL, SQLite

Tools: Git, GitHub, Docker, Docker Compose, Render

Foundations: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Additional: Technical SEO, Core Web Vitals, API Integrations, WebRTC

EDUCATION & LEADERSHIP

Education: B.Tech in Computer Science and Engineering - AI-ML · Jagannath University, Jaipur · 2023 - 2027 · CGPA: 8.4/10

DevSummit Lead Organizer: Led a 24-hour national hackathon with 1000+ registrations and 500+ participants.
